

Emergency Waste Management Plan

This Emergency Plan is supported by and read together with the Waste Management Policy.

In the event of an emergency relating to hazardous substances and spills at {org.name}, all workers must:

1. Evacuate the contaminated area.
2. Decontaminate the eyes and skin of exposed personnel immediately.
3. Inform the designated person (usually the Principal), who should coordinate the necessary actions.
4. Determine the nature of the spill.
5. Evacuate all the people not involved in cleaning up if the spillage involves a particularly hazardous substance.
6. Provide first aid and medical care to injured individuals.
7. Secure the area to prevent exposure of additional individuals.
8. Provide adequate protective clothing to personnel involved in cleaning-up.
9. Limit the spread of the spill and clean up in accordance with Waste Management Policy.
10. Neutralize or disinfect the spilled or contaminated material if indicated in accordance with the Waste Management Policy.
11. Collect all spilled and contaminated material in accordance with the Waste Management Policy. Sharps should never be picked up by hand; brushes and pans or other suitable tools should be used. Spilled material and disposable contaminated items used for cleaning should be placed in the appropriate waste bags or containers.
12. Decontaminate or disinfect the area in accordance with the Waste Management Policy.
13. Rinse the area, and wipe dry with absorbent cloth.
14. Decontaminate or disinfect any tools that were used.
15. Remove protective clothing and decontaminate or disinfect it if necessary.
16. Seek medical attention if exposure to hazardous material has occurred during the operation.
17. If the Plan is implemented a review by the Principal (or delegate) of its effectiveness will occur and relevant changes to the Emergency Plan will be made if necessary.

Approved By: The Board of {org.legal_name}	Version 1
