

Administering Medication Checklist & Medication Chart

VERSION 1.0	EFFECTIVE 	NEXT REVIEW 	OWNER 	APPROVED BY
----------------	-----------------------------------	-------------------------------------	-------------------------------	-------------------------------------

The medication chart is completed by the participant's medical officer and updated whenever a medication changes. Only workers trained in medication administration may administer medication, in strict accordance with the prescriber's directions and from the original packaging or dose administration aid. Complete the checklist for every administration and initial the chart. Report any error or incident under the Incident Management and Reporting Policy.

Client		DOB		Allergies	
GP / prescriber		Pharmacy		Chart date	

Before administering — the "rights" check
