## PURPOSE AT A GLANCE

This policy explains how [REDACTED] manages the risks of COVID-19 and other pandemic infections — monitoring official health advice, applying infection prevention and control measures, screening and excluding unwell people, continuing critical supports, and communicating changes to workers, participants and their support networks.

## 1. Purpose and scope

This policy supports [REDACTED] to apply the Risk Management NDIS Practice Standard. It applies to all services and supports delivered by [REDACTED] and to all employees, contractors and volunteers (**Workers**), who must take full responsibility for understanding and following it. It should be read alongside the related documents in the final section and the corresponding procedures in the Policy Register.

## 2. Policy aims

[REDACTED] is committed to ensuring that:

- risks to participants, workers and [REDACTED] arising from COVID-19 and other pandemic infections are identified, analysed, prioritised and treated, consistently with the risk management system and current government and public health advice.

## 3. About COVID-19

COVID-19 is a contagious viral infection that generally causes respiratory illness. Presentation ranges from no symptoms to severe illness with potentially life-threatening complications. It spreads by contact with respiratory secretions and contaminated objects. Because official advice changes rapidly, [REDACTED] monitors health alerts from the Australian Government and public health authorities and implements the measures they recommend.

## 4. Prevention and control measures

[REDACTED] applies the measures in the Infection Control Policy and the Managing and Reducing Known Risks Matrix, including: hand and respiratory hygiene; the use of masks and other PPE in line with current advice; physical distancing where practicable; enhanced cleaning of frequently touched surfaces; screening for symptoms and recent exposure before support; and excluding workers and participants who are unwell or required to isolate. Workers are supported to keep vaccinations up to date where relevant.

## 5. Continuity and communication

identifies the supports that are critical to each participant's safety, health and wellbeing and plans to continue them — including through remote or telehealth delivery, backup workers, and coordination with the participant's other providers. Changes to supports are explained and agreed with the participant and communicated to workers and support networks. Where a worker or participant is diagnosed, follows public health directions, notifies as required, and reviews the effectiveness of its response.

## 6. Definitions

, ABN .

### Client

A client of , including an NDIS participant.

### Key Management Personnel (KMP)

, and other key management personnel involved in from time to time.

### Principal

### Legislation Register

The register of legislation, regulations, rules and guidelines maintained by .

### Policy Register

The register of policies of .

### Worker

A permanent, fixed-term or casual member of staff, a contractor or a volunteer engaged by , including the Principal.

### Workplace

Any place where a worker carries out work for — its business premises; a participant's home (or part of it), a vehicle or a community venue; and any necessary accommodation owned or controlled by the Principal.
