

Work Health & Safety Checklist (Home Visit)

VERSION 1.0	EFFECTIVE 	NEXT REVIEW 	OWNER 	APPROVED BY
-----------------------	-----------------------------------	-------------------------------------	-------------------------------	-------------------------------------

Complete this checklist before providing support at a workplace, in accordance with the Work Health and Safety Policy, and review it for each workplace. For each hazard you identify, note the control. With controls in place, rate the workplace **low** (acceptable — follow the controls), **medium** (use only after consultation with the Principal; reduce risks first), or **high** (proceed only with the Principal's approval after re-assessing risks and considering other options). **If you have any concern about the risk, do not provide services — refer to the Principal or a senior staff member.**
