

VERSION 1.0	EFFECTIVE 	NEXT REVIEW 	OWNER Principal / Key Management Personnel	APPROVED BY Governing body
-----------------------	--	--	--	--------------------------------------

This policy explains how [redacted] manages the risks of COVID-19 and other pandemic infections — monitoring official health advice, applying infection prevention and control measures, screening and excluding unwell people, continuing critical supports, and communicating changes to workers, participants and their support networks.

This policy supports [] [] the Risk Management NDIS Practice Standard. It applies to all services and supports delivered by [] [] all employees, contractors and volunteers (**Workers**), who must take full responsibility for understanding and following it. It should be read alongside the related documents in the final section and the corresponding procedures in the Policy Register.

Committed to ensuring that:

- COVID-19 is a contagious viral infection that generally causes respiratory illness. Presentation ranges from no symptoms to severe illness with potentially life-threatening complications. It spreads by contact with respiratory secretions and contaminated objects. Because official advice changes rapidly, [redacted] monitors health alerts from the Australian Government and public health authorities and implements the measures they recommend.

Control measures are the measures in the Infection Control Policy and the Managing and Reducing Known Risks Matrix, including: hand and respiratory hygiene; the use of masks and other PPE in line with current advice; physical distancing where practicable; enhanced cleaning of frequently touched surfaces; screening for symptoms and recent exposure before support; and excluding workers and participants who are unwell or required to isolate. Workers are supported to keep vaccinations up to date where relevant.
