

Incident Report Form

VERSION 1.0	EFFECTIVE	NEXT REVIEW	OWNER Incident Manager	APPROVED BY Governing body
-----------------------	-----------	-------------	----------------------------------	--------------------------------------

HOW TO USE THIS FORM

Complete this form for **all incidents**. Part A (Fact Finding) is completed at or near the scene; Part B (Investigation) is completed once the facts have been gathered. The purpose is to identify facts and improve systems to prevent a recurrence — **it is critical not to attribute blame**. If the incident is a Reportable Incident, an internal investigation must take place. Keep supporting material (emails, records of conversations, external reports) on file with this form, in confidence, under the Incident Management and Reporting Policy.
